As a professional driver, I find it nearly impossible to get local traffic info when needed. Once you find a station that "may" update traffic, you have to wait until they decide you're ready to hear it and then what you get is usually a 2 minute run through that barely helps cover you're needs. Travelling into major cities is much easier now, thanks to xm traffic and weather. I know where to go to get the info I need when I need it. Also, being on the road so much is easier to live with when enjoying the xm radio content. I value my time and money. I PAY for this service on my own choosing because of what they offer. NO POLITICS-NO LOUSY DJ'S-NO COMMERCIALS-24/7 ANYTHING I WANT, ANYTIME I WANT IT, ANYWHERE I'M AT PROGRAMMING. Take a lesson big corporate "local" radio. You couldn't pay ME to listen to the poor programming you offer. Address the obvious problems in "YOU'RE" programming and leave us happy listeners alone.

Thank you xm satellite radio!
